1. Introduction

Welcome to **SecuroGuard**, an AI-powered web platform designed to detect fake reviews on e-commerce product pages. This manual provides a complete guide for using the platform's features, from logging in to analyzing product review authenticity.

2. System Requirements

- Modern web browser (Chrome, Firefox, Edge)
- Internet connection
- Valid SecuroGuard user account (manual or Google login)

3. Accessing the Application

1. Open your preferred browser.
2. Visit the official SecuroGuard URL.
3. Login using your email/password or Google authentication.
4. If you're a new user, click **Register** and fill out the form.

4. Dashboard Overview

After logging in, users are directed to the **Dashboard**, which displays:

- Recent analyzed product links
- Quick access to report history
- Button to start a new fake review analysis
- Account menu and profile icon

5. Analyzing Product Links

1. Go to the **Home/Analyze Page**.
2. Paste a valid product link from supported e-commerce sites (e.g., Amazon).
3. Click **Analyze**.
4. The system processes the reviews and identifies fake vs genuine ones using the trained AI model.

6. Viewing Report Details

1. After analysis, the system redirects to the **Review Analysis Report**.
2. View breakdown of total reviews, fake/genuine counts, average rating, and confidence score.
3. Charts and graphs summarize the findings for better understanding.
4. Click **Download Report** for offline use.

7. Managing Your Profile

1. Click the profile icon from the navbar.
2. Edit personal details or view login info.
3. Logout securely from this page if needed.

8. Review History

1. Go to **Recent Searches** section on the homepage or profile.
2. See the last 5 product links analyzed with quick access to their reports.
3. Click any item to re-open its analysis report.

9. Logging Out

- Click the **Logout** button in the navbar to end your session securely.

10. Support

For assistance or feedback:

- Contact the SecuroGuard team at: [your-email@example.com]
- Visit our help center for FAQs and guides (if applicable)
